

CHRISTIAN MOMDJIAN

(818) 641-4054 ▪ chrismomdjian@gmail.com ▪ chrismomdjian.github.io/chrismomdjian-portfolio/

LANGUAGES AND TECHNOLOGIES

- HTML5; CSS3; JavaScript/ES6; React.js; React Native; Redux; jQuery; PHP5+; MySQL; Python3+;
- Bootstrap; Firebase; Leaflet.js; Flask; Linux OS; Git/Github; Object-oriented programming
- Trello; Bitbucket; Android Studio, AWS, Wordpress

EXPERIENCE

Wordpress Developer (remote) ▪ EZ Marketing Concepts ▪ Nov. 2016 – Present

- Created websites for multiple clients using the Wordpress CMS and plugin system.
- Added HTML and CSS code to customize websites for each client.
- Made sure to finish projects within same day/next day of assignment unless project is large.
- Gained experience with basic SEO principles such as internal links, text-readability and relevance, and easy-to-find call-to-action ui buttons.

Jr. React-Native Developer (internship) ▪ FastGo Freight Inc. ▪ Dec. 2017 – May 2018

- Built an application which tracks driver locations in real-time using Firebase, Leaflet.js, and React.js with Redux.
- Utilized the AirBnB react-native-maps package to allow agents to see truck driver locations using the React Native admin app for both iOS and Android devices.
- Created a scoreboard system using React and Redux which sorts based on agents' monthly earnings in descending order.
- Built single-page-applications using React Router.
- Consistently kept track of tickets and various tasks using Trello.
- Parsed and formatted data coming from a Firebase API and created an interface for agents to download and remove image uploads from Firebase Cloud Storage using React.js.
- Learned to build applications which are easily maintainable in order to allow other developers and myself to work on specific components quickly when features needed to be added.

Jr. Full-Stack Developer (internship) ▪ Higher.team ▪ Jan. 2017 – Mar. 2017

- Built a PHP-powered scheduling software system for students of Higher.team to schedule appointments to meet with their instructor using a calendar-type interface.
- Interned with senior developers and completed tasks via Slack.
- Added Select2 jQuery search filter for kidbank ruby-on-rails web application.
- Fixed various bugs in different applications and took feedback into consideration from users and developers in my team.

Webmaster ▪ Genie Air Conditioning ▪ Aug. 2016 – Jan. 2017

- Maintain websites airconditioner.com, indiecharts.com, hiphop.net, and easylisening.com.
- Fix issues with media players and online mp3 upload forms on indiecharts.com.
- Updated MySQL database with pricing and specifications for air-conditioner units.
- Created HTML5/CSS3/Bootstrap landing pages to display a/c models such as olmominisplits.com.
- Wrote MySQL queries against a relational database.

EDUCATION

Glendale Community College • Associate in Web Development/Programming • 3.8 GPA

- Relevant Coursework: Python Programming, Java Programming, PHP and MySQL, HTML5 and CSS3, UNIX/Linux Operating System, Web Scripting, Intro to Computer Networks.
- Built a PHP-powered online form for instructors to submit pdf documents to school server which would be integrated into GCC website.
- Placed in Dean's list 4 times.

PERSONAL PROJECTS

- **Web Portfolio:** Online portfolio which displays my experience as a web developer and technical skills. Built with PHP and MySQL on back-end and HTML5, CSS3, JavaScript on front-end.
- **CourseLogger:** PHP powered web-app that keeps track of courses needed to complete my A.S. degree.
- **Christmas List Log:** Python/Flask/SQLite3 powered app which keeps track of christmas gifts I've purchased for friends and family.
